

Algebra Homework

Directions: Solve each equation for the variable and show your work.

Part A

Question 1

$$x + 7 = 15$$

Question 2

$$\frac{m}{6} = 3$$

Response to question 2 Using drawpad

$$4Y - 5 = 15$$

MathPix Snip Entry MathML

$$\frac{m}{6} = 3$$

Equations using the MS editor

$\sqrt{3}$

$$(x + a)^n = \sum_{k=0}^n \binom{n}{k} x^k a^{n-k}$$

MathML Version

$$(x + a)^n = \sum_{k=0}^n \binom{n}{k} x^k a^{n-k}$$
